

Filkrypto

File encryption software that
protects classified information up to the
Restricted level.

Tutus is a comprehensive cybersecurity company specialized in information and network security, with a strong focus on encryption. Founded in 1992, we develop high-end solutions for mission-critical organisations that require reliable protection for classified information at the Restricted level.

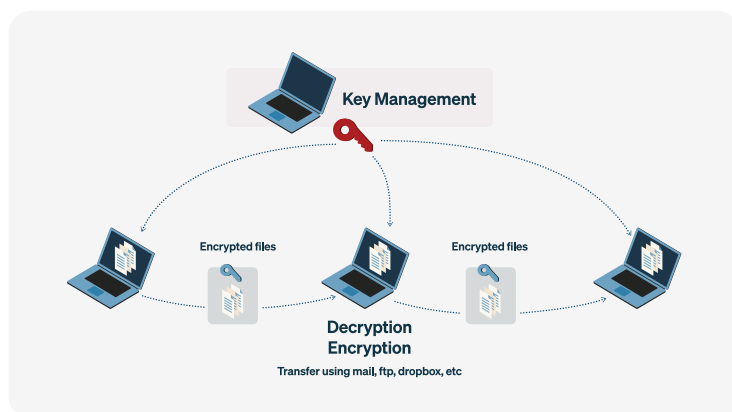

Filkrypto

File encryption software that protects classified information up to the Restricted level.

With an intuitive drag-and-drop interface, Filkrypto makes it easy to encrypt and decrypt files and folders. The software includes built-in key management, allowing users to create, import, export, distribute, and securely protect encryption keys.

Encrypted files can be safely shared through any medium – including email, USB drives, or cloud services – without compromising security.

Certified and approved

Filkrypto is a high-assurance software approved for handling EU and NATO information up to the Restricted level.

Strong encryption

Filkrypto uses AES 256-bit, symmetric keys for encryption, protecting information against unauthorized access and modification.

- Easy-to-use with drag-and-drop functionality
- Emergency key erase
- Supports both Key Administrator and Normal User roles
- No hardware dongle required
- Black keys for secure distribution
- Password generator supports Diceware passphrases
- Supports Windows 10, Windows 11 and Linux
