

- » **Secure Connectivity in High-Risk Environments — Leave-Behind Capable**
- » **Suite B Encryption for Type 1 Secret and Below**
- » **Mission-Appropriate for Allies, Government Agencies, Law Enforcement, and 1<sup>st</sup> Responders**
- » **The 1<sup>st</sup> CHVP HAIBE® Non-CCI Crypto**

Create secure IP connections with U.S. warfighters and government agencies, without the deployment limitations, expensive logistics, and lifecycle costs associated with Controlled Cryptographic Items (CCI). The AltaSec IPS-250 is an Inline Network Encryptor (INE) that complies with NSA Cryptographic High Value Product (CHVP) Policy CNSSI\_4031 for Non-CCI handling of HAIBE® Suite B devices.

Loaded with HAIBE® IS Compliant Suite B, the IPS-250 is ideal for high-risk and unmanned environments, including leave-behind and coalition networks.

Supporting the secure exchange of classified information up to the Secret level, this INE is appropriate for government agencies with users in their networks who may not have COMSEC accounts or want to minimize COMSEC logistics. Organizations such as the FBI, FEMA, Department of Homeland Security, and first responders can securely exchange information over IP between agencies, creating secure gateways over untrusted networks wherever and whenever needed.

With exclusive capabilities such as embedded network acceleration and an intuitive interface, the IPS-250 delivers easy-to-use, faster, more efficient network security above and beyond standard HAIBE® requirements.

To avoid COMSEC logistics and start connecting securely with defense and other government agencies, count on the IPS-250 — the first Non-CCI device for high-speed Type 1 IP encryption.

### ALTASEC IPS-250 AT-A-GLANCE

#### CHVP CONOPS Advantages

- » Secret and Below InfoSec without the COMSEC logistics
- » Non-CCI and interoperable with CCI HAIBE® devices operating in Suite B
- » Secure networking between military and government agencies
- » Secure connectivity for high-risk operations such as UAVs, unattended sites, and sensors
- » Leave-behind capable

#### HAIBE IS/FI Suite B Operation

- » AES-256 (GCM mode)
- » ECDSA Authentication
- » SHA-256/384 Hashing
- » HAIBE® IS v4.1.0 and v3.1.2 compliant
- » HAIBE® to HAIBE® over the air/net keying

#### Exclusive Networking Capabilities

- » Software upgradable
- » Faster performance over high-latency links with optional embedded TCP/IP accelerator (xPeP)
- » Multicast video on demand
- » Browser-based HMI configurations
- » Centralized VINE Manager™ software provided at no extra cost, seamlessly manage multiple INEs

#### High-Speed IP Network Encryption

- » Full-duplex 100 Mbps Ethernet (200 Mbps aggregate)
- » Full-mesh network capability

#### Premium Support

- » INE trade-in program available
- » 3-year warranty (extended options available) Free training and 24/7 technical support

# AltaSec® IPS-250 CHVP Type 1 High-Speed IP Network Encryptor

\* Suite A/Suite B operation supported in all AltaSec INEs except for the IPS-250, which supports Suite B only.

## SPECIFICATIONS

### NETWORKING FEATURES AND PROTOCOLS

<b>Protocols Supported</b>	TCP, UDP, IPv4/IPv6 Dual Stack, ICMP, IGMP, ARP, DHCP
<b>Networking</b>	Dynamic IP addressing, dynamic key management, red address confidentiality, dynamic peer discovery, virtual local area networks, embedded OSPF routing
<b>Management</b>	SNMP & HTTPS browser-based management, VINE Manager
<b>Multicast</b>	IGMP on red and black subnet
<b>Quality of Service (QoS)</b>	Type of service octet bypass
<b>Fragmentation</b>	Supports fragmentation and header options for red IP packets

### NETWORK INTERFACES

#### Red Data Interfaces - Ethernet

» Electrical/Mechanical: IEEE 802.3; 10/100 Mbps copper, RJ-45

#### Red Data Interfaces - Ethernet

» Electrical/Mechanical: IEEE 802.3; 10/100 Mbps copper, RJ-45

### CRYPTO CHARACTERISTICS

<b>Algorithms</b>	Type 1 Secret and Below Suite B Cryptography
<b>Key Fill Interface</b>	DS-101
<b>Flexibility</b>	Modular, reprogrammable Architecture
<b>Crypto Ignition Key CIK</b>	Removal to UNCLASSIFIED NON-CCI

### PHYSICAL

<b>Dimensions (WxHxD)</b>	7.5 x 1.68 x 11.9 in; 190.5 x 42.7 x 302.2 mm
<b>Weight</b>	6.5 lb; 2.9kg
<b>Power</b>	+5 VDC and +3.3 VDC; 13.7W typical
<b>Battery</b>	External user replaceable battery, one "1/2AA" lithium cell, 9 month operating life typical

### RELIABILITY AND MAINTENANCE

<b>Predicted MTBF</b>	312,000 hours
<b>Predicted MTTR</b>	15 mins
<b>Other</b>	Extensive power up and online BIT

### ENVIRONMENT

<b>Operating Temperature</b>	0° to +50°C cold starting; tested to -23°C ambient
<b>Non-Operating Temperature</b>	-20° to +70°C
<b>Operating Altitude</b>	Up to 50,000 ft
<b>Non-Operating Altitude</b>	Up to 69,000 ft
<b>Non-operating rapid</b>	27,000 ft to 69,000 ft in 15 seconds

**Shock:** MIL-STD-810F 516.5 Procedure I SRS curve: 9 to 45 g from 10 Hz to 45 Hz w 6dB slope, 45 g from 45 Hz to 2000 Hz

#### Vibration

- » MIL-STD-810F 514.5 Procedure I Cat 24: 0.04g<sup>2</sup>/Hz from 20 Hz to 2000 Hz for 15 minutes each on 3 main orthogonal axes
- » MIL-STD-810F, 516.5, Procedure I, ground equipment with a peak acceleration of 40g
- » RTCA-DO-160E, Section 8, Category S, Curve B: 0.012g<sup>2</sup>/Hz for 10 to 40 Hz, 0.012g<sup>2</sup>/Hz to 0.002g<sup>2</sup>/Hz for 40 to 100 Hz, 0.002g<sup>2</sup>/Hz for 100 to 500 Hz, and 0.002g<sup>2</sup>/Hz to 0.00013g<sup>2</sup>/Hz for 500 to 2000 Hz for 1 hour each on 3 main orthogonal axes

<b>EMI/EMC</b>	FCC Class B and EN 55022 Class B
<b>Humidity (Non-Condensing)</b>	95% @+60°C for 96 hours per MIL-STD-810F, Method 507.4

### CERTIFICATION

NSA Certified for Secret and Below  
TEMPEST Compliant NSTISSAM 1/92

### ORDERING INFORMATION

<b>Part Number</b>	1101398
<b>Available for Order</b>	Through IDIQ and ViaSat
