# KILGETTY PLUS NT4

KILGETTY Plus NT 4 is a total disk encryption product, which protects data stored on computer hard and floppy disks against unauthorized access in the event of loss. KILGETTY Plus NT4 is designed for use with IBM compatible desktop and portable computers running Microsoft Windows NT4 SP6 with unlimited sized hard disks. All data held on the computer's hard disk is fully encrypted, including data structures, operating system and applications. Access is via a touch memory device (read by a reader attached to the serial port), user identity and password.
