

TheGreenBow VPN Client

Certified CC EAL3+

NATO and EU Restricted

Certified VPN Client

Trusted Communication

The CC EAL 3+ Certification of TheGreenBow VPN client testifies the reliability and cryptographic strength of TheGreenBow Software solutions. The Certification process not only guarantees the security level of the certified product, but also the quality of the procedures, documentation and support deployed by TheGreenBow.

The Certification level achieved for TheGreenBow VPN client qualifies the product for the **communication of "classified information"** to be used by Government agencies and essential operators.

The EAL 3+ certified VPN client: A unique solution

TheGreenBow™ VPN client is the first VPN client worldwide to achieve the Common Criteria EAL 3+ Certification and to receive the NATO restricted and EU restricted agreements. This certification validates that TheGreenBow™ VPN client meets the very restrictive security standards required for use with Government agencies and strategic national operators (OIVs).

EAL3+ certified end-to-end communication

With TheGreenBow™ Certified VPN client, customers operating high-security infrastructures are enabled to establish trusted end-to-end communication channels. It is particularly suited for secure communications with personal workstations. It's the solution for protecting the transmission of confidential data of strategic operators and critical infrastructures in finance, administration or defense.

Universal IPsec VPN Client

TheGreenBow™ certified VPN client is compatible with Windows XP and Windows 7. It is also compatible with virtually all IPsec Gateways and supports all common Smartcards and Tokens and integrates easily with any PKI.

Integration with IT Infrastructures

TheGreenBow™ certified VPN client easily integrates with existing infrastructures due to its advanced deployment options, its seamless PKI integration (automatic detection of Tokens and certificates), and a large number of configuration – and command line options.

Scalability

TheGreenBow™ VPN client was designed to be scalable and to adapt to various environments, regardless of the size of your project.
